ABOUT US

Riakona Group is a 100% Black owned company founded by a combination of passion and curiosity to take built environment to higher heights in terms of quality. Fifty percent of the skills base is occupied by women. A team of professionals who form part of this organization have a well-grounded technical capacity and impeccable background in built environment and are able to bring innovation and creativity that satisfy customers and maintain greater relationships. Our team has greater records of completing complex projects on time within budget and with a very high level of quality.

Being driven by passion, our team has the ability to make the client to realise value for money in their projects. Over the years our experienced team has delivered quality in their different previous environments of employment and gained confidence to work on building projects, multifunctional engineering projects and road construction together with energy management projects not limited to substation refurbishment but also construction of transmission lines and distribution of electricity connection to new developments. We are proud of our capability to take off projects from initiation to closure.

OUR VISION

To be the most preferred company in delivering multi-disciplinary engineering projects in South Africa.

OUR VALUES

- Priority to quality.
- Customer centric.
- Innovation.
- Passion to delivery.

TAKING BUILT ENVIRONMENT TO HIGHER HEIGHTS

MISSION STATEMENT

In support to our ambitious vision, we endeavour to deliver the best service to the satisfaction of all our customers. Our quality perspective is meeting the needs of the customers both specified and implied coupled by approval by all regulatory bodies relevant to the type of projects.

BROAD BASED BLACK ECONOMIC

Riakona Group is a 100% Black owned company with greater drive to empower historically disadvantaged individuals with skills and restore their dignity by offering a reliable employment which improves people's confidence and help them realise their full potential. We have recently created a conducive environment in our working spaces in order to accommodate people living with disabilities.
