

TRAXTION

UNSTOPPABLE RAIL POWER

THINK EXPONENTIAL

Traxtion

ADVANCED AFRICA

For decades, Traxtion has been a leading provider of technically advanced, comprehensive rail services and solutions.

FINANCING A

The Traxtion group has positioned itself as a key player in the market. Its deep financial capacity that is complemented by its renowned technical ability, brings great value to its customers. We put Africa first. We focus on linking the continent and increasing profitability for its people. We reveal new horizons, bring fresh prospects, promote progress – and we do it with genuine passion. When you deal with us, you deal with highly skilled, accountable, fair people with a reputation for delivering exceptional quality and reliability. Our commitment to ensuring that Africa's rail system matches world-class standards is unwavering.

Traxtion

JOURNEYS AND JUNCTIONS

TRAXTION OPERATIONS

With one of the largest, privately owned mainline locomotive fleets on the African continent, Traxtion is a force to be reckoned with. Our comprehensive set of services includes full service rail freight, rail network operations, locomotive operations, and leasing.

We adhere to the highest safety standards at all times. Traxtion is RSR accredited and ISO9001 certified.

**High quality,
cost effective
parts are
synonymous
with Traxtion.**

HARNESSING HORSEPOWER

Technical

Decades of experience in maintaining, rebuilding and overhauling locomotives to OEM standards and a skilled team of in-house artisans are what allow us to connect and move Africa.

Maintenance

We specialise in the repair and maintenance of diesel and electric locomotives as well as rolling stock for mining, industrial, freight and state-owned enterprises throughout Sub-Saharan Africa.

Locomotive Rebuild and Overhaul

With the development of our Rosslyn rail services hub, we have the ability to rebuild up to 9 locomotives at any time, giving us the capacity to match our capabilities.

Track Services

We provide light track maintenance for sidings and small branch lines as well as new track installations.

Field Services

Our dedicated team of diesel electric fitters makes use of our mobile workshop system to speedily respond to breakdowns and other problems in remote areas.

Part Sales

Strong supplier relationships and a refusal to deliver anything but high quality, cost effective parts are synonymous with Traxtion Rail. We only sell locomotive, wagon, and track parts that we would use in our own fleet. We add extra value for our customers through unit exchange and parts refurbishment.

Rosslyn Technical Base

Our 50 000 sqm rail service hub has 11 000 sqm under roof. By collaborating with complementary rail services providers we are able to offer our clients the equivalent of a 'one-stop-shop'.

'GROWTH NEEDS INFRASTRUCTURE. AFRICA IS GROWING'

ENABLING SAFETY

Safety and Compliance

Ultimate reliability makes us who we are. That's why we use our decades of experience and the constant refining of our own business to provide advice you can trust. Our practical advisory services include:

- ISO 9001 accreditation**
- RSR compliance**
- Safety management systems**
- Full spectrum safety and compliance audits**
- Occupational health and safety**

ALL ABOARD

HR and Training

We operate in an exciting field filled with possibility – and firmly believe in the power of motivation, training and inspiration. Our TETA- accredited diesel electric technical training centre in Gauteng puts apprentice artisans through an intensive 3-year course that culminates in a red seal trade test certificate. Our training centre also runs driver training and refresher courses. In keeping with our commitment to quality, our trade test officer is fully accredited by the National Moderating Body.
